Email: [leo.smith@hotmail.fr](mailto:leo.smith@hotmail.fr)

Website: [p4p1.github.io](https://p4p1.github.io)

## My Skills:

### Programming languages:

C, Java, Bash, Python, Javascript, ARM Assembly, Arduino C++

### Markup languages:

HTML, CSS

### Languages:

Fluent French, Fluent English (those are my two native languages)

### Misc:

Electronics, Basic Low Level Computer Security, Basic Web Computer Security, Linux Administration

## My Work Experience:

### Pharmaceutical stock clerck — 2013 (one week): Cachan, Ile de France

Stored medicine on a daily basis. Also helped printing and storing medicinal order for customers and gave direction to customers inside of the store.

### Banking assistant — 2017 (one month): Gobelins, Paris Ile de France

Stored all the archives of the bank to help the employees to find checks and banking folders. I then assisted the employees in welcoming the clients, setting up their appointment with their banking advisors. I also escorted clients to their personal safes and to deposit cash.

### Programming Assistance — 2017 (one week): UpWork

Had to write a function, without any external library, in C that retrieves the source code from any WebSite.

### Script improvement — 2017 (three months): UpWork

Improved an existing python script that executes sub scripts in a special environment. Monitoring them so that if they stay active for a certain time period they will be terminated.

## My Education:

### Lycee Guste Eiffel, Cachan — Finished: Baccalaureate.

Basic computer science, studied basic micro controllers and electric components. Basic networking, C++, HTML, CSS, Javascript programming.

**Epitech, Paris — current: Software architect and Computer networking and security, MBA Buisness and managment.**

Learning computer and software architecture in procedural and object oriented programming. Average networking and computer security. Advanced networking, C, C++, Basic Linux Administration.
